

Will the beach always be the way it is now? Not unless you help to preserve it!

Will the water always be swimmable if we don't act to preserve its cleanliness?

Will Wrightsville Beach's skyline be dominated by trees and sunrises or smokestacks?

Will you be able to run or walk on the beach with the increased ozone?

How many more fish will be added to the list of species too burdened by Mercury for human consumption?

Let your legislators know that you want the State Environmental Policy Act to stand. Let them know that not just the Titan cement plant project but all risky industrial projects should be subject to environmental review before any permits are issued.

Projects that have the potential to destroy our estuaries, beaches, rivers, drinking water and air should be scrutinized - not rubber-stamped!
